

# HiSim Data Package for PIEG-Strom

---

Collection with weather data as well as thermal and electrical loadprofiles for the HiSim Framework (<https://github.com/FZJ-IEK3-VSA/HiSim>) regarding the simulations for VDI 4657 guideline and the webtool "PIEG-Strom Online"

## Information

Every folder contains a `readme.md` with information about source and license of the `data_raw`.

Final data files were produced with the `process_data.ipynb` notebooks and saved into `data_processed` folder.

Complete data set, see: <https://zenodo.org/record/6547713>
